 Notice of References Cited (PTO-892) Notice of Draftsperson's Patent Drawing Review (PTO-948 Information Disclosure Statement(s) (PTO-1449 or PTO/SE Paper No(s)/Mail Date 11/26/04. 		

Drawings

1. Figure 6, 7, 8 and 9 should be designated by a legend such as --Prior Art-- because only that which is old is illustrated. See MPEP § 608.02(g). Corrected drawings in compliance with 37 CFR 1.121(d) are required in reply to the Office action to avoid abandonment of the application. The replacement sheet(s) should be labeled "Replacement Sheet" in the page header (as per 37 CFR 1.84(c)) so as not to obstruct any portion of the drawing figures. If the changes are not accepted by the examiner, the applicant will be notified and informed of any required corrective action in the next Office action. The objection to the drawings will not be held in abeyance.

Claim Rejections - 35 USC § 102

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

- (e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.
- 3. Claims 1 and 4 are rejected under 35 U.S.C. 102(e) as being anticipated by Damgaard et al.

Damgaard et al discloses a multi-band RF architecture (Fig. 1, 2) comprising the following limitations of the claimed radio apparatus:

Art Unit: 2634

In claim 1, "a quadrature modulator for making the transition of the phase of modulated wave via in-phase component and a quadrature component" (11), "a first voltage-controlled oscillator for outputting a first transmission signal" (111, 113, 115), "a second voltage-controlled oscillator" (67, 57, 59, 61), "first mixer for frequency-converting the first transmission signal based on the output signal of the second voltage-controlled oscillator" (116), "a phase comparator for comparing the phase of the output signal of the quadrature modulator with the phase of the output signal of the first mixer" (102), "a low-pass filter for filtering the component below a predetermined frequency the output signal the phase comparator and supplying the resulting signal to the frequency control terminal of the first voltage-controlled oscillator" (104), "a first band-pass filter for outputting a signal obtained by filtering the component in a predetermined frequency band of the output signal of the quadrature modulator as a second transmission signal" (13).

In claim 4, "a first transmitter for amplifying a first transmission signal output from the first voltage-controlled oscillator and transmitting the resulting signal via an antenna; and a second transmitter for amplifying a second transmission signal output from the second band-pass filter and transmitting the resulting signal via an antenna" (Fig. 4, 123, 121, Fig. 1, 19, 24).

Allowable Subject Matter

4. Claims 2, 3, 5 and 6 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Application/Control Number: 09/893,854 Page 4

Art Unit: 2634

5. The following is a statement of reasons for the indication of allowable subject matter: Prior art of record, taken individually or collectively, fails to incorporates the following claimed limitations: "a third voltage-controlled oscillator; a second mixer for frequency-converting the output signal of the first band-pass filter based on the output signal of the third voltage-controlled oscillator; and a second band-pass filter for outputting a signal obtained by filtering the component in a predetermined frequency band of the output signal of the second mixer as a second transmission signal" or "a second mixer for frequency-converting the output signal of said first band-pass filter based on the output signal of the second voltage-controlled oscillator; and a second band-pass filter for outputting a signal obtained by filtering the component in a predetermined frequency band of the output signal of the second mixer as a second transmission signal" in the manner as claimed.

Conclusion

6. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Higuchi discloses a multi-band radio terminal apparatus.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Amanda T Le whose telephone number is (571) 272-3052.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Stephen Chin can be reached on (571) 272-3056. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see http://pair-direct.uspto.gov. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free).
